VIENNA INTERNATIONAL AIRPORT (LOWW) – OPERATIONS OF ACFT WITH WINGSPAN EXCEEDING 65 M

Limitations for operations of ACFT with wingspan exceeding 65 M

Vienna International Airport is currently running a compatibility project for operations of ACFT with wingspan exceeding 65 M.

At present, Vienna International Airport may neither be planned as destination nor as operational alternate for ACFT with wingspan exceeding 65 M until required infrastructure measures and operational procedures are implemented and the necessary permits have been obtained.

In the interests of aviation safety, precautionary (e.g. for technical or medical reasons) and emergency landings are under following operational considerations already possible today:

Operational considerations for precautionary and emergency landings operations of ACFT with wingspan exceeding 65 M

Arrival & Departure Procedure

All published procedures are not calculated for category DL.
Pilots should inform ATC of type of aircraft at initial call.

Ground operations:

Taxiing will be assisted by Marshaller.
Only open stand available
De-icing not granted

Rescue and fire fighting:

Rescue and fire fighting category 10 on request

REF AIP Austria, LOWW AD 2
