3.8 Instrument flight procedures					
3.8.1* Adherence to departure and arrival routes and ATC instructions	P →	$\rightarrow$		М	
3.8.2* Holding procedures	P→	$\rightarrow$			
3.8.3* 3D operations to DH/A of 200 ft (60 m) or to higher minima if required by the approach procedure					
Note: According to the AFM, RNP APCH p shall be chosen taking into account such lin					
3.8.3.1*manually, without flight director	P →	$\rightarrow$		M (skill test only)	
3.8.3.2* Manually, with flight director	P →	$\rightarrow$			
3.8.3.3* With autopilot	P →	$\rightarrow$			
3.8.3.4* Manually, with one engine simulated inoperative; during final approach, either until touchdown or through the complete missed approach procedure (as applicable), starting: (i) before passing 1000 ft above aerodrome level; and (ii)after passing 1000 ft above aerodrome level.  In aeroplanes which are not certificated as transport category aeroplanes (JAR/FAR 25) or as commuter category aeroplanes (SFAR 23), the approach with simulated engine failure and the ensuing go-around shall be initiated in conjunction with the 2D approach in accordance with 3.8.4. The go-around shall be initiated when reaching the published obstacle clearance height/altitude (OCH/A); however not later than reaching an MDH/A of 500 ft above the runway threshold elevation. In aeroplanes having the same performance as a transport category aeroplane regarding take-off mass and density altitude, the instructor may simulate the engine failure in accordance with exercise 3.8.3.4.	P →	<b>→</b>		M

11 Guidelines for the conduct of the skill test

#### PASS MARKS

In the case of multi-pilot and single-pilot high performance complex aeroplanes, applicants shall pass all sections of the skill test or proficiency check. Failure in more than five items will require applicants to take the entire test or check again. Applicants failing 5 or fewer items shall take the failed items again. Failure in any item on the re-test or re-check, including those items that have been passed on a previous attempt, will require applicants to repeat the entire check or test again.

#### FLIGHT TEST TOLERANCE

Applicants shall demonstrate the ability to:

- a) operate the aeroplane within its limitations;
- b) complete all manoeuvres with smoothness and accuracy;
- c) exercise good judgement and airmanship;
- d) apply aeronautical knowledge;
- e) maintain control of the aeroplane at all times in such a manner that the successful outcome of a procedure or manoeuvre is never in doubt;
- f) understand and apply crew coordination and incapacitation procedures, if applicable; and
- g) communicate effectively with the other crew members, if applicable.

The following limits shall apply, which can be corrected to make allowance for turbulent conditions and the handling qualities and performance of the aeroplane used:

Height		Tracking	
Generally	± 100 ft	On radio aids	± 5°
Starting a go-around at decision height/altitude	+ 50 ft / - 0 ft	For "angular" deviations	Half scale deflection, azimuth and glide path (e.g. LPV, ILS, MLS, GLS)
minimum descent height/MAPt/altitude	+ 50 ft / - 0 ft	2D (LNAV) and 3D (LNAV/VNAV) "linear" lateral deviations	Cross-track error/deviation shall normally be limited to ± ½ of the RNP value associated with the procedure. Brief deviations from this standard up to a maximum of one time the RNP value are allowable.
-	-	3D linear vertical deviations (e.g. RNP APCH (LNAV/VNAV) using BaroVNAV)	Not more than - 75 ft below the vertical profile at any time, and not more than + 75 ft above the vertical profile at or below 1000 ft above aerodrome level.
Speed		Heading	
all engines operating	± 5 knots	all engines operating	±5°
with simulated engine failure	+ 10 knots / - 5 knots	with simulated engine failure	± 10°

FO\_LFA\_ACW\_037\_EN\_v 4\_0 22.03.2023 10/11

Application for the issue of a Multi-Crew Pilot Licence MPL according to Commission Regulation (EU) No 1178/2011 Annex I (Part-FCL) Subpart E

#### CONTENTS OF THE SKILL TEST/PROFICIENCY CHECK

- a) The following symbols mean:
  - P Trained as PIC or co-pilot and as PF and PM for the issue of a type rating as applicable
  - OTD Other training devices may be used for this exercise
  - X An FFS shall be used for this exercise; otherwise an aeroplane shall be used if appropriate for the manoeuvre or procedure
  - P# The training shall be complemented by supervised aeroplane inspection
- b) The practical training shall be conducted at least at the training equipment level shown as (P), or may be conducted up to any higher equipment level shown by the arrow →

The following abbreviations are used to indicate the training equipment used:

A aeroplane

FFS full-flight simulator

FSTD flight simulator training device

- c) The starred items (\*) shall be flown solely by reference to instruments.
- d) Where the letter 'M' appears in the skill test or proficiency check column, this indicates that the exercise is a mandatory or a choice of exercises where more than one exercise appears in the Manoeuvres/Procedures column.
- e) An FFS shall be used for practical training and testing if the FFS forms part of an approved type rating course. The following shall be considered when approving such a course:
  - the qualifications of the instructors;
  - ii) the qualification and the amount of training provided on the course in an FSTD; and
  - iii) the qualifications and previous experience on similar types of the pilots under training.
- f) Manoeuvres and procedures shall include MCC for multi-pilot aeroplane and for single-pilot high-performance complex aeroplanes in multi-pilot operations.
- g) Manoeuvres and procedures shall be conducted in single-pilot role for single-pilot high-performance complex aeroplanes in single-pilot operations.
- h) In the case of single-pilot high-performance complex aeroplanes, when a skill test or proficiency check is performed in multi-pilot operations, the type rating shall be restricted to multi-pilot operations. If privileges of single-pilot are sought, the manoeuvres/procedures in 2.5, 3.8.3.4, 4.4, 5.5 and at least one manoeuvre/procedure from section 3.4 have to be completed in addition as single-pilot.
- i) In the case of a restricted type rating issued in accordance with FCL.720.A(e), applicants shall fulfil the same requirements as other applicants for the type rating except for the practical exercises relating to the take-off and landing phases.
- j) To establish or maintain PBN privileges, one approach shall be an RNP APCH. Where an RNP APCH is not practicable, it shall be performed in an appropriately equipped FSTD.
  - By way of derogation from the subparagraph above, in cases where a proficiency check for revalidation of PBN privileges does not include an RNP APCH exercise, the PBN privileges of the pilot shall not include RNP APCH. The restriction shall be lifted if the pilot has completed a proficiency check including an RNP APCH exercise.
