7 Attachments (Pleas	e attach, <u>if not spe</u>	ecified differently, copies o	of the l <u>isted o</u>	docum <u>ents</u>	to the application		

- · Medical certificate
- Pilot logbook (original)
- Residential registration form
- Either birth certificate and certificate of citizenship or official photo-ID (original or attested copy)
- · Radiotelephony licence
- Protocol of the language proficiency examination (if not already submitted by LPE)
- · Confirmation of payment of the examination fee
- 1 passport picture
- In case of credits according to 6 g) enclose relevant documentation

11 Languange Proficiency Ex	
Language proficiency German acco	rding to ZPH FCL 7 verified by LPE/LPLE/flight examiner
Name	Place
Date	Signature
German Level 6 (informal examinati	on only for German native speakers)
Note: Applicants whose mother-tone	que level is not ascertainable beyond doubt, have to pass an examination in a LAB

based on a certified test for German language assessment.

Guidelines for the conduct of the PPL(A) skill test - AMC1 FCL.235

CONTENT OF THE SKILL TEST

- (a) The route to be flown for the navigation test should be chosen by the FE. The route may end at the aerodrome of departure or at another aerodrome. The applicant should be responsible for the flight planning and should ensure that all equipment and documentation for the execution of the flight are on board. The navigation section of the test should have a duration that allows the pilot to demonstrate his/her ability to complete a route with at least three identified waypoints and may, as agreed between the applicant and FE, be flown as a separate test.
- (b) An applicant should indicate to the FE the checks and duties carried out, including the identification of radio facilities. Checks should be completed in accordance with the authorized checklist for the aeroplane on which the test is being taken. During pre-flight preparation for the test the applicant should be required to determine power settings and speeds. Performance data for take-off, approach and landing should be calculated by the applicant in compliance with the operations manual or flight manual for the aeroplane used.

FLIGHT TEST TOLERANCE

- (c) The applicant should demonstrate the ability to:
 - (1) operate the aeroplane within its limitations;
 - (2) complete all maneuvers with smoothness and accuracy;
 - (3) exercise good judgment and airmanship;
 - (4) apply aeronautical knowledge;
 - (5) maintain control of the aeroplane at all times in such a manner that the successful outcome of a procedure or maneuver is never seriously in doubt.
- (d) The following limits are for general guidance. The FE should make allowance for turbulent conditions and the handling qualities and performance of the aeroplane used:
 - (1) Height

(i) normal flight $\pm 150 \text{ ft}$

(ii) with simulated engine failure ± 200 ft (if ME aeroplane is used)

(2) Heading or tracking of radio aids

(i) normal flight ± 10

(ii) with simulated engine failure $\pm 15^{\circ}$ (if ME aeroplane is used)

(3) Speed

i) take-off and approach + 15 / - 5 knots

) all other flight regimes ± 15 knots
