German Level 6 (informal examination only for German native speakers)

Note: Applicants whose mother-tongue level is not ascertainable beyond doubt, have to pass an examination in a LAB based on a certified test for German language assessment.

## CONTENTS OF THE SKILL TEST

- (a) The area and route to be flown should be chosen by the FE and all low level and hover work should be at an adequate aerodrome or site. Routes used for section 3 may end at the aerodrome of departure or at another aerodrome. The applicant should be responsible for the flight planning and should ensure that all equipment and documentation for the execution of the flight are on board. The navigation section of the test should consist of at least three legs, each leg of a minimum duration of 10 minutes. The skill test may be conducted in two flights.
- (b) An applicant should indicate to the FE the checks and duties carried out, including the identification of radio facilities. Checks should be completed in accordance with the authorised checklist or pilot operating handbook for the helicopter on which the test is being taken. During pre-flight preparation for the test the applicant is required to determine power settings and speeds. Performance data for take-off, approach and landing should be calculated by the applicant in compliance with the operations manual or flight manual for the helicopter used.

## FLIGHT TEST TOLERANCE

- (c) The applicant should demonstrate the ability to:
  - (1) operate the helicopter within its limitations;
  - (2) complete all manoeuvres with smoothness and accuracy;
  - (3) exercise good judgment and airmanship;
  - (4) apply aeronautical knowledge;
  - (5) maintain control of the helicopter at all times in such a manner that the successful outcome of a procedure or manoeuvre is never seriously in doubt.
- (d) The following limits are for general guidance. The FE should make allowance for turbulent conditions and the handling qualities and performance of the helicopter used:
  - (1) height
    - (i) normal forward flight  $\pm 150$  ft
    - (ii) with simulated major emergency  $\pm 200$  ft
    - (iii) hovering IGE flight  $\pm 2$  ft
  - (2) heading or tracking of radio aids
    - (i) normal flight  $\pm 10^\circ$
    - (ii) with simulated major emergency  $\pm 15^\circ$
  - (3) speed
    - (i) take-off approach  $+ 15$  knots /  $- 10$  knots
    - (ii) all other flight regimes  $\pm 15$  knots
  - (4) ground drift
    - (i) take-off hover IGE  $\pm 3$  ft
    - (ii) landing no sideways or backwards movement
