

Regulation on Air Operations (OPS) Training

Introduction

This three-day workshop serves as an introduction to the applicable EU regulations for flight operations and can be deepened in special subject areas through active participation by the participants.

Course Content

- ⤴ Relevant EU regulations: overview and structure
- ⤴ Regulation (EU) No 2018/1139 ("Basic Regulation") - Overview
- ⤴ Regulation (EU) No 965/2012 ("Air Operations") – Overview and selected focal points
- ⤴ Management system
- ⤴ Approval processes
- ⤴ Supervision by the competent authority

Learning Objectives

This course provides a comprehensive overview of flight operations requirements with a focus on commercial flight operations (CAT).

The applicable legal bases and their approval processes are explained, put into context and practiced using practical examples.

Target Group

- ⤴ Operators (CAT) of aircraft and helicopters
- ⤴ Continuing airworthiness personnel and compliance monitoring managers
- ⤴ Aviation Authorities (NAAs) / flight operations departments
- ⤴ Companies (outside EASA) who intend to implement European regulations
